Avajadi document profile

This file exercises every element the template styles, and doubles as the smoke test. Body text is IBM Plex Sans, headings are Space Grotesk, code is JetBrains Mono. Links look like this one, and inline code like `md2pdf --rebuild`.

Lists

- Charcoal and cream come from the panda logo
- Bamboo green is the single accent
  - used for H1 rules, H3 headings, links and code borders
  - and for list markers, like these
- Everything else stays neutral

1. Write Markdown
2. Run `md2pdf file.md`
3. Get `file.pdf` next to it

- [x] Fonts embedded
- [ ] Coffee

A third-level heading

Term
: A definition list entry, which plain GFM doesn't have.

Another term
: Its definition.

Fourth level

Fifth level

SIXTH LEVEL

Tables

Component	Role	Tech
Hub	Wi-Fi access point and router	Raspberry Pi
Server	Forwards audio streams	LiveKit
App	Listener and interpreter UI	Flutter
Mixer	Floor plus questioner	GStreamer

Code

```
docker build -t avajadi-md2pdf:latest .
md2pdf example.md
```

> A blockquote, for notes and asides that deserve to stand apart from the text.

Some ~~struck~~ text, some **bold** and *italic*, and a footnote.[1]

---

1. Footnotes land at the end of the document in muted text.
